

MEET THE OUTPOST 6.5

Our award-winning four-season truck camper, ready for whatever's next.

WHY OUTPOST CAMPERS?

BUILT FOR MORE DAYS OUT THERE

We believe the best adventures start with the freedom to go. Outpost Campers are designed and built in Southwest Colorado by people who love getting outside as much as you do.

The Outpost 6.5 brings four-season comfort, serious off-grid capability, and a thoughtfully finished interior to a camper that fits a wide range of compatible trucks. For 2027, a lighter, better-insulated shell and smart updates throughout make our award-winning camper even more capable.

FOUR-SEASON COMFORT

A well-insulated composite shell with roughly R-11 insulation helps keep you comfortable when the weather changes, so your camping season doesn't have to end when summer does.

POWER FOR THE PLACES YOU WANT TO GO

Our propane-free design pairs an industry-leading 48V off-grid electrical system with flexible charging, giving you the power to spend more time away from hookups.

A SPACE THAT FEELS LIKE HOME

Durable aluminum cabinetry, bamboo countertops, and thoughtful details make the interior a comfortable place to settle in after a day outside.

CAMPER SPECS

The award-winning Outpost 6.5 packs four-season comfort and an industry-leading off-grid electrical system into a lightweight, capable truck camper. For 2027, a lighter, better-insulated shell makes it even more ready for the road ahead. Explore the key specifications below.

Dry Weight: 1485 lbs (approximately)

Floor: 76.5” L

Truck Compatibility: Compatible full-size half-ton and larger trucks. Payload and dimensions vary by truck.

Bed Size Capatability: Standard 6.5’ beds with tailgate up. Shorter beds with tailgate off or down.

Interior Height: 77” H

Bed Dimensions: 59.5” W x 78.5” L

Exterior Dimensions: 49” W (wheel well) x 83” W (overall width) x 134.25” L x 86.5” H

Fuel Sources: Electricity, Diesel (optional)

Electric System: 5kWh LFP battery, 4000 watt inverter, 60 amp DC-DC charger, Dual solar MPPT charge controller, 250w solar panel, 30 amp shore power

Fresh Water Capacity: 20 gallons

Shell Construction: Hybrid composite construction uses PET and XPS foam cores for a lightweight, well-insulated, and durable shell. Two piece aluminum extrusion system with thermal break.

Kitchen: Portable induction cooktop, 90l fridge, deep sink with folding facuet and cutting board.

Happy

STANDARD FEATURES + AVAILABLE OPTIONAL ADD-ONS

The Outpost 6.5 comes ready for adventure, with four-season construction, an industry-leading off-grid electrical system, and durable, refined finishes. Optional add-ons let you make it yours.

WHAT COMES STANDARD

Kitchen: A portable induction cooktop, 90L refrigerator, and deep stainless steel sink with a cutting board make it easy to prepare meals and clean up at camp.

Sleeping & Dining: A 5-inch memory foam RV queen mattress provides a comfortable place to rest, while the dinette converts into a second sleeping area for an additional guest.

Bathroom & Water: A removable cassette toilet, 20-gallon freshwater system, and quick-release hose make everyday tasks and cleanup easier at camp.

Electrical System: The propane-free 6.5 comes standard with an industry-leading 48V EcoFlow Independence Power Kit, a 5 kWh LFP battery, and a 250W rooftop solar panel. Recharge with solar, the 60-amp DC-DC charger, or 30-amp shore power. A prewired external solar port makes it easy to add portable solar.

Lighting: Dimmable overhead and under-cabinet lighting, reading lights, porch and entry lighting, and a rear scene light help you settle in after dark.

Construction & Finishes: The lighter, four-season hybrid composite shell is paired with double-pane windows, durable aluminum cabinetry, and bamboo countertops for a comfortable, refined interior built for life on the road.

Storage & Ventilation: New cab-over storage keeps essentials close to the bed, while in-floor storage helps keep gear out of the way. A roof-mounted Maxxair Deluxe fan keeps fresh air moving through the camper.

Mounting: Four mechanical jacks with drill chucks help you load and unload the camper, while internal ratchet tie-downs secure it to the truck.

AVAILABLE ADD-ONS: TAILOR IT TO YOUR SETUP

COMFORT & CLIMATE

FROLI Sleep System: Adds comfort and airflow beneath the mattress.

DC-Powered Air Conditioner: Adds battery-powered cooling off-grid. New for 2027, keep the standard Maxxair Deluxe fan alongside the A/C.

On-Demand Hot Water: Brings convenient hot water without propane or bulky tanks.

Indoor Shower Enclosure: Creates a simple shower setup inside the camper.

Diesel Heater: Adds reliable dry heat for cold-weather camping and higher elevations.

Insulated Rear Door Cover: Adds privacy and extra insulation at the rear door.

OFF-GRID POWER

Additional Rooftop Solar Panel: Adds a second 250W rooftop panel for faster recharge times.

400W Folding Solar Panel: Adds portable solar for flexible charging off-grid.

VIEWS & LIVABILITY

Dual Front Panel Window: Adds more natural light and expanded 270° views from the cabover sleeping area.

STORAGE & UTILITY

Rear Ladder: Makes roof access easier for cleaning solar panels or reaching gear.

Roof Rack: Adds flexible rooftop carrying capacity for gear, boards, or other adventure equipment.

MOLLE Panels: Add modular exterior storage for awnings, recovery boards, RotopaX, shovels, and more.

180° Awning: Creates a shaded outdoor space on the passenger side.

Toilet Options: Choose a Compo Closet Cuddy Lite composting or S1 dry-flush toilet instead of the standard cassette toilet.

Modular Closet Shelves: Keep clothing and gear organized and within reach.

FITMENT & LOADING

Electric Jacks: Upgrade from manual jacks for easier loading and unloading at the push of a button.

Camper Jack Extensions: Add clearance for wider tires, duallies, or larger fender flares.

TRUCK FITMENT & COMPATIBILITY

The Outpost 6.5 is designed for some full-size half-ton and larger trucks. At approximately 1,485 lbs dry, including the standard 5kWh battery, it stays lighter and more usable than many traditional truck campers.

WHAT BUYERS SHOULD KNOW:

- Designed for compatible full-size half-ton and larger trucks. Check your truck's payload and bed dimensions to confirm fit.
- On standard beds 6' 6" and longer, the tailgate can close with the camper on. Shorter beds may still work, but the tailgate may need to stay down or be removed.
- Water, gear, passengers, and accessories all count toward your truck's payload.

KEY FITMENT CHECKS

- Confirm payload for your truck (or the one you're looking at)
- Measure bed length
- Measure width between wheel wells
- Measure bed-rail height
- Measure cab height from the bed floor

Keeping the tailgate up can add an easy way to secure the camper, preserve built-in tailgate steps, and create a useful porch area. The camper's approximate 23.5" center of gravity also helps it maintain strong drivability across long, standard, and short-bed setups.

For final confirmation, compare your truck directly against the Truck Fitment Guide found on our website and reach out to the Outpost team with questions.

OWNER GALLERY & TESTIMONIAL

The best way to get to know the Outpost 6.5 is to hear from the people who take it out there. From weekend escapes to longer trips, these owners share what life with an Outpost looks like.

"I've spent years searching for the right truck camper. None have been better than Outpost Campers. The team is super helpful, kind, and insanely talented. Highly recommend for anyone in the market for a quality truck camper."

Cody, 2026 Outpost 6.5 Owner

"I couldn't imagine going any other route! From the initial conversation to years later, this crew has been outstanding and the camper is absolutely perfect for all season adventures."

Braden, 2025 Outpost 6.5 Owner

"Outpost team is amazing. First - a very very high quality camper. Fit / finish / build are amazing. One thing I really appreciate - a decent owners manual, complete you tube walk arounds and individual videos on each component of the trailer. Well done!"

Larry, 2026 Outpost 6.5 Owner

"Great purchasing experience everyone was very friendly and informative. The camper itself has been amazing. I can't count how many nights I've spent in it since purchasing last month but no matter what the temperature has been from 100°+ to the mid 30°s it has been comfortable. Product quality is top notch."

Craig, 2026 Outpost 6.5 Owner

AN AWARD WINNING CAMPER

We built the Outpost 6.5 to help people spend more time exploring the places they love. Along the way, its four-season comfort, off-grid capability, and thoughtful design caught the attention of both truck camper experts and readers. We're proud to have earned these two awards, and even prouder to see where our owners take their campers.

HOW ORDERING WORKS

The Outpost purchase process is built to be clear from deposit to delivery.

STEP 1: RESERVE YOUR PRODUCTION SPOT

Secure your place in line with a deposit through the website.

STEP 2: FINALIZE YOUR BUILD

Several weeks before production, the Outpost team sends a form to lock in your options and create your Buyer's Order.

STEP 3: CONFIRM YOUR PRODUCTION DEPOSIT

A second deposit of $4,000 confirms your final configuration and build slot in the production line. Both your initial and second deposits go toward your final camper cost.

STEP 4: PRODUCTION BEGINS

Once selections and deposit are confirmed, the build begins and delivery details are coordinated.

STEP 5: TAKE DELIVERY

1. Pickup in Bayfield, Colorado

2. Ship directly to you

If shipping is selected, unloading may require a forklift. For full details and current terms, see the Purchase Process Guide on our website.

STEP 6: FINAL PAYMENT

The remaining balance is due 2 business days before pickup or shipment. Financing up to 90% of the final cost of the may be available.

OUTPOST

READY TO RESERVE YOUR CAMPER?

If the Outpost 6.5 feels like the right fit, the next step is simple: reserve your production slot on the website. If you still have questions, the Outpost team can help confirm fitment, options, and next steps.
